LinkedIn : <https://www.linkedin.com/in/mir-furkaan-96b527291/>

PROFILE

Data Analyst with hands-on experience across healthcare, retail, education, and workforce datasets, using Python, SQL, and Power BI to clean, analyze, and visualize data for decision-making. Comfortable turning raw data into a clear narrative for both technical and non-technical audiences, with a growing interest in labor market and business-trend analytics.

SKILLS

Languages: Python, C, HTML, R, JavaScript

Tools/Platforms: Jupyter, Google Colab, Power BI, Tableau, RapidMiner, Cisco Packet Tracer, MS Office, Spring

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, SciPy, Tkinter, CSV, MATLAB

Databases: SQL, MySQL, SQLite

Core Strengths: Data cleaning & EDA, dashboarding & storytelling, problem-solving, project management, adaptability

PROJECTS

Netflix Data Analysis | *Personal Project* | 2026

- Analyzed a Netflix content dataset to compare the split between movies and TV shows and uncover overall catalog composition.
- Explored country-wise content distribution to identify which regions contribute the most titles to the platform.
- Identified the most popular genres and analyzed how much content was added to the platform each year.
- Visualized ratings distribution across titles to understand content classification patterns.

Tech: Python, Pandas, Matplotlib, Seaborn, Data Visualization

Healthcare Analytics | *Capstone Project (Offsite)* | Mar 2026 – Apr 2026

- Analyzed patient and hospital datasets using SQL, Python, Pandas, and Power BI to identify trends in treatment outcomes and resource utilization.
- Performed data cleaning, transformation, and exploratory analysis to improve data quality and reporting accuracy.
- Built interactive Power BI dashboards to visualize healthcare KPIs and support data-driven decision-making.

Tech: SQL, Python, Pandas, Power BI, Data Visualization

Retail and Marketing Analytics | *Capstone Project (Offsite)* | Feb 2026 – Mar 2026

- Analyzed retail sales and customer datasets to identify purchasing patterns, customer preferences, and product performance trends.
- Performed data cleaning, transformation, and EDA to evaluate marketing campaign effectiveness and sales growth.
- Built interactive Power BI dashboards to monitor business performance and support data-driven decisions.

Tech: SQL, Python, Pandas, Power BI, Data Visualization, Marketing Analytics

Student Examination Analytics | *Academic Project* | Sep 2024 – Nov 2024

- Analyzed examination scores, CGPA, attendance, and stress-level data from 1,000+ students to identify performance trends.
- Performed data cleaning and statistical analysis using Python, Pandas, and NumPy to generate academic insights.
- Created 20+ visualizations and Power BI reports using Matplotlib and Seaborn to highlight behavior-performance correlations.

Tech: Python, Tkinter, Pandas, NumPy, Matplotlib, Seaborn, SQLite, Power BI, Google Forms

CERTIFICATES & JOB SIMULATIONS

- Data Analysis with Python – IBM (Jun 2026)
- Business and Data Analytics – SkillsetMaster (Jan 2026)
- Preparing Data for Analysis with Microsoft Excel – Microsoft, Coursera (Sep 2025)
- Python for Data Science – IBM, Coursera (Aug 2024)
- Microsoft Power BI – Coursera (Aug 2024)
- Software Engineering – Saylor Academy (Aug 2024)

EDUCATION

Lovely Professional University Jalandhar, India
Master of Computer Applications – Computer Science; CGPA: 7.2 Aug 2023 – 2025

University of Kashmir Srinagar, Kashmir, India
Bachelor of IT; Percentage: 80% Apr 2019 – Sep 2023

Government Boys Higher Secondary School Kupwara, Kashmir, India
Intermediate; Percentage: 73% Apr 2016 – Mar 2017
